

## Mitigation Annex 1

Technical Screening Criteria		BREEAM Criteria	Details
<b>Substantial contribution</b>		Part 2: Ene 19-Ene 21 operational energy calculator  Ene 22 Energy audit  Ene 23 Energy consumption reporting	Ene 19-Ene 21 Complete the operational energy calculator - no minimum credit score  Ene 22 An energy audit has been carried out within the last 4 years - 2 or more credits  Ene 23 Energy consumption reporting - data is collected and compared against targets - 2 or more credits
<b>Do Not Significant Harm DNSH Criteria</b>	<b>Climate Change Adaptation</b>	The climate risk and vulnerability assessment is proportionate to the scale of the activity and its expected lifespan, such that:  (a) for activities with an expected lifespan of less than 10 years, the assessment is performed, at least by using climate projections at the smallest appropriate scale;  (b) for all other activities, the assessment is performed using the highest available resolution, state-of-the-art climate projections across the existing range of future scenarios consistent with the expected lifetime of the activity, including, at least, 10 to 30 year climate projections scenarios for major investments.	Rsl 01 Flood risk assessment  Rsl 06 Emergency plans and climate related physical risks
		Rsl 01 The Flood Risk Assessment must include all sources of flooding and have an allowance of Climate Change.  First Question = (C or 'C with D' or F) AND Second Question = G  Rsl 06 6 Credits need to be achieved  First question = B and C AND Second question = G OR H	

## Adaptation Annex 2

Technical Screening Criteria		BREEAM Criteria	Details
<b>Substantial contribution</b>		Rsl 06 Emergency plans and climate related physical risks	Rsl 06 criteria 3, 4 and 5 in particular (answer selection B-D and G and H).  First question = B and C and D AND Second question = H
